EXAFS studies of pillared clay catalysts. 201
J. M. Corker, J. Evans and J. M. Rummey (Southamptohn, UK)

Synthesis and characterization of heterometallic carbonyl cluster anions. 211
A. Fumagalli (Milan, Italy)

High resolution ^{31}P solid state NMR in phosphorus-transition metal compounds 221
R. Gobetto (Torino, Italy)

Coupling effects in infrared spectra from supported metal catalyts 235
V. M. Browne, S. G. Fox and P. Hollins (Reading, UK)

Metal–metal bonding network in tetranuclear planar clusters 245
C. Mealli and D. M. Proserpio)Florence, Italy)

Production of Ni-Ru bimetallic catalysts and materials by thermal and chemical decomposition of a tetranuclear bimetallic carbonyl cluster 251
A. Armigliato (Bologna, Italy), S. Bigi (Modena, Italy), P. Moggi, S. Papadopulos, G. Predieri (Parma, Italy), G. Salviati (Parma, Italy) and E. Sappa (Turin, Italy)

Interaction of metallocenes with oxidic surfaces 261
G. Spoto, A. Zecchina, S. Bordiga and R. Dante (Turin, Italy)

Mono- and poly-nuclear species of vanadium on the TiO_2 (anatase) surface 271
G. Centi, D. Pinelli and F. Trifiro' (Bologna, Italy)

Modelling the interaction of molecules with the silica surface hydroxyl: an overview 287
E. Garrone and P. Ugliengo (Turin, Italy)

Contributed Papers

An XPS study on ruthenium compounds and catalysts. 297
C. L. Bianchi, V. Ragaini (Milan, Italy) and M. G. Cattania (Milan, Italy)

The bonding modes adopted by organo-fragments on metal cluster surfaces 307
G. Conole (London, UK)

Review
Perpendicular *versus* parallel alkynes, monohapto *versus* dihapto vinyls, aromatic *versus* non-aromatic heterocycles: access to different types of bonding of these ligands in clusters. 323
A. J. Deeming (London, UK), A. J. Arce and Y. De Sanctis (Caracas, UK)

Infrared intensities and frequencies of the vibrational modes of the C_2H_4 unit in organometallic systems 333
E. Diana, R. Rossetti (Turin, Italy), P. L. Stanghellini (Sassari, Italy)

Time-resolved FTIR study of the interaction of $Cr(CO)_6$ with α-Cr_2O_3 347
E. Escalona Platero and C. Otero Aréan (Palma de Mallorca, Spain), D. Scarano, G. Spoto and A. Zecchina (Turin, Italy)

A potential for molecular dynamics simulations of structural and dynamic properties of hydrate aluminosilicates 357
P. Demontis, G. B. Suffritti (Sassari, Italy), E. S. Fois, A. Gamba and G. Morosi (Milan, Italy)

Carbon dioxide and nitrous oxide complexes of Cr(II) supported on silica 369
E. Garrone, S. Abello, E. Borello, G. Ghiotti and A. Zecchina (Turin, Italy)

An EPR study on the formation of the superoxide radical ion on monoclinic zirconia 379
E. Giamello, M. Volante, B. Fubini, F. Geobaldo and C. Morterra (Turin, Italy)

Chemisorption and oxidative interaction of trimethylamine on Ru/TiO_2 387
E. Guglielminotti and F. Boccuzzi (Turin, Italy)

Synthesis and spectroscopic characterization of the $[Fe_4P(CO)_{13}H_{m-n}]^{n-}$ ($m=3$, $n=0$, 1, 2, 3; $m=2$, $n=2$) clusters: crystal structure of $[PPh_4]_2[Fe_4P(CO)_{13}H]$ 395
M. Canè, M. C. Iapalucci, G. Lngoni (Bologna, Italy), F. Demartin (Milan, Italy) and L. Grossi (Bologna, Italy)

A multitechnique analytical characterisation of the isomerisation catalyst $Ir_4(CO)_{12}$ on silica 405
A. Trovarelli (Udine, Italy), C. Malitesta, L. Sabbatini (Bari, Italy), S. Maschio and J. Kašpar (Trieste, Italy)

Relativistic Clusters 419
S. F. A Kettle (Norwich, UK)

Low-temperature CO_2 adsorption on metal oxides: spectroscopic characterization of some weakly adsorbed species 425
G. Ramis, G. Busca and V. Lorenzelli (Genova, Italy)

Novel dimeric species produced by CO interaction with surface F-type centres on Mg-doped MgO: an IR study 437
L. Marchese, S. Coluccia, G. Martra, E. Giamello and A. Zecchina (Turin, Italy)

End-on surface coordinated (adsorbed) CO_2: a specific ligand for surface Lewis acidic centres 447
C. Morterra, G. Cerrato and C. Emanuel (Turin, Italy)

Bi-dimensional CO clusters at the surface of polycrystalline monoclinic ZrO_2 457
C. Morterra, L. Orio, V. Bolis and P. Ugliengo (Turin, Italy)

Analytical electron microscopy of clusters; evidence of a stabilizing interaction between transition metal carbonyl clusters and amorphous carbon supports 467
R. Devenish, B. T. Heaton, S. Mulley (Liverpool, UK) and G. Longoni (Bologna, Italy)

A study of the interaction between iron(III)oxide and titanium(IV)oxide at elevated temperatures 475
R. I. Bickley (Bradford, UK), T. Gonzalez-Carreno (Madrid, Spain) and L. Palmisano (Palermo, Italy)

CO clusters on MgO studied by low-temperature UV-visible diffuse reflectance spectroscopy 489
M. Bailes and F. S. Stone (Bath, UK)

Bimetallic catalysts derived from heteronuclear clusters; CO hydrogenation and olefin hydroformylation on $Rh–Mo/SiO_2$ catalysts 503
A. Trunschke, H. Ewald, H. Miessner (Berlin, FRG), A. Fukuoka, M. Ichikawa (Sapporo, Japan) and H.-C. Böttcher (Halle, FRG)
